

Patent Application of James Guo and Wendy Zang for “Book Holder on the Steering Wheel” continued – page 6

CLAIMS

1. A book holding device adapted for use with a vehicle steering wheel comprising;
 - (a) an upper filleted rectangle support plate;
 - (b) a lower filleted rectangle support plate;
 - (c) a hinge for connecting the said support plates together;
 - (d) two identical mating pad of the hook-and-loop fasteners;
 - (e) two identical hook-and-loop fastening pad straps;
 - (f) a foldable shelf;
 - (g) two identical elastic loops;
 - (h) two identical elastic bands.
2. A book holder as defined in claim 1, wherein said book holding device on the steering wheel is fastened to a steering wheel wherein said upper filleted rectangle support plate is the same width as said lower filleted rectangle support plate.
3. A book holder as defined in claim 1, wherein said lower filleted rectangle support plate could be folded or turned up 180 degree to join with upper filleted rectangle support plate to get the smaller size for storage.
4. A book holder as defined in claim 1, wherein said fastening means comprises the hook-and-loop fastening pad straps and two identical mating pad of the hook-and-loop fasteners.
5. A book holder as defined in claim 1, wherein said a mounted foldable shelf member which can be turned 90 degree down to form a support platform to hold the printed matter or electronic devices. This foldable shelf member also can be turned 90 degree up and be folded into the smaller size for storage. This foldable shelf is mounted on the lower filleted rectangle support plate.
6. A book holder as defined in claim 1, wherein said two identical elastic loops hold the pens.
7. A book holder as defined in claim 1, wherein said two identical elastic bands prevent unexpected book pages turning
